

PRANEET S

BACKEND DEVELOPER — PYTHON

(+91) 7548882265 | praneetsatheeshraj@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | Tamil Nadu, India

PROFESSIONAL SUMMARY

Python Backend Developer and DevOps Enthusiast with hands-on experience building and deploying production-grade web applications using Django, FastAPI, Docker, and AWS. Delivered systems covering REST APIs, JWT authentication, CI/CD pipelines, and cloud infrastructure (EC2, S3, RDS, Lambda, IAM, CloudWatch, Terraform). Proficient in containerization, database optimization (MySQL, PostgreSQL), and modern Git workflows with GitHub Actions and Jenkins.

TECHNICAL SKILLS

Programming: Python, JavaScript

Backend: Django, FastAPI, Django REST Framework, JWT Authentication, REST APIs

Databases: MySQL, PostgreSQL, SQLAlchemy ORM, Django ORM

Cloud / DevOps: AWS (EC2, S3, RDS, Lambda, IAM, CloudWatch), Docker, Terraform, Nginx, Gunicorn

CI/CD & Tools: Jenkins, GitHub Actions, Git, GitHub, Postman

Concepts: OOP, Data Structures & Algorithms, Cloud Architecture, Serverless, Networking, Celery, RabbitMQ, Redis

WORK EXPERIENCE

Pinnacle Labs

2025

Python Developer Intern

- Designed and delivered 3+ end-to-end Python applications across the full development lifecycle, from scoping to production deployment.
- Engineered scheduling and automation modules that eliminated 80% of manual workflows, improving operational efficiency across 2 production builds.
- Architected modular, reusable codebases applying OOP principles, structured data pipelines, and file I/O handling, reducing onboarding time for new developers.
- Strengthened application reliability through iterative testing and continuous refactoring; maintained zero critical bugs across final production releases.

PROJECTS

Agri Market — Full Stack Agricultural Marketplace

12/2025-06/2026

Python · Fast API · PostgreSQL · SQLAlchemy · Redis · Celery · JavaScript · WebSocket · Razorpay · ReportLab · Docker · Nginx · GitHub Actions · Terraform (AWS)

Designed and built a scalable B2B marketplace platform from scratch, enabling two-sided transactions between supply-side and demand-side users.

- Architected a modular FastAPI backend with 9 domain-specific routers handling Auth, Products, Demands, Orders, Payments, Agreements, Chat, Matching, and Admin.
- Implemented production-grade JWT authentication with refresh token rotation, Redis-backed token blacklisting, rate limiting, phone verification, and password reset, securing all 40+ API endpoints.
- Built real-time WebSocket chat with live presence detection, typing indicators, and message persistence via PostgreSQL.
- Integrated Razorpay payment gateway with UPI/GPay support and an escrow system, holding payment until the buyer confirms delivery.
- Containerized the full stack with Docker Compose (FastAPI + PostgreSQL + Redis + Celery + Nginx) and automated CI/CD using GitHub Actions.
- Built an admin dashboard with real-time KPI cards, Chart.js analytics, user management, order tracking, inventory monitoring, audit logs, and CSV/PDF report exports.

Shop Kart — E-Commerce Web Application

10/2023 – 02/2024

Python · Django · MySQL · Bootstrap 5 · Docker

Full-stack e-commerce platform with product management, cart, orders, and containerized deployment.

- Built a full-stack e-commerce platform with product listing, cart management, order workflows, and user authentication, serving as a production-ready template used in 2 client demos.
- Designed and implemented a normalized MySQL database schema (8 tables) for efficient product, user, inventory, and transaction management with referential integrity.
- Implemented secure session-based authentication, password hashing, and CSRF protection across all transactional endpoints.
- Containerized the entire application using Docker with multi-stage builds, reducing environment setup time from 2 hours to under 5 minutes.

Cloud Fund — Blockchain Chit Fund System

08/2024 – 03/2025

Python · Django · Solidity · Web3.js · MetaMask · AWS S3

Decentralized chit fund platform ensuring transaction transparency via Ethereum smart contracts.

- Developed a Django-based chit fund management system handling participant registration, bidding workflows, winner selection, and fund tracking for groups of 10–50 members.
- Wrote and deployed Solidity smart contracts on Ethereum Sepolia Testnet, guaranteeing tamper-proof transaction records and automated fund distribution with zero manual intervention.
- Integrated Web3.js and MetaMask for wallet-based authentication and on-chain payment processing; handled 100+ test transactions with full auditability.
- Integrated AWS S3 for secure document storage (KYC, agreements); optimized Django ORM queries, reducing average page load by 40%.

EDUCATION

M.E. Computer Science & Engineering — Cloud Computing

2024 - 2026

Sri Krishna College of Engineering and Technology, Coimbatore, Tamil Nadu

B.E. Computer Science & Engineering

2020 – 2024

Bannari Amman Institute of Technology, Tamil Nadu · CGPA: 8.19 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Certifications in Claude code action and Claude with anthropic AI (2026)
- Finished python technology stack course in Infosys virtual intern (2026)
- AWS Fundamentals — Udemy (2025)
- Problem Solving Certification — HackerRank (2024)
- Gold Badge in Python & Gold Badge in Problem Solving — HackerRank
- 100 Days Coding Challenge Badge — Code Chef (2024)
- Programming Foundations: Databases — Udemy (2022)
